Jamie Lane – Chief Economist and SVP of Research

Jamie Lane is the Chief Economist and SVP of Research at AirDNA, the go-to source for short-term rental data and insights. With 10+ years of experience as an economist in the hospitality industry, Jamie's research leadership has helped the whole STR industry understand the drivers of success. Jamie is a leading voice of authority on the health and outlook for the STR industry: on top of co-hosting AirDNA's own podcast, the STR Data Lab, he is a regular contributor to international media outlets such as Wall Street Journal, New York Times and Bloomberg, providing exclusive analysis and forecasts of the industry to global audiences. His groundbreaking contributions to the STR space and dedication to promoting data-driven decision-making to the forefront of the industry were recognized in 2023 with the Innovator/Disruptor award at the highly regarded Shortyz Awards. At the forefront of AirDNA's research, Jamie continuously provides accurate data insights to guide hosts through each decision point in their journey. Before joining AirDNA, Jamie spent 10 years at CBRE, leading research and forecasting teams to support client analysis. Jamie holds a Bachelor of Science in Economics from the University of Georgia and a Master of Science in Business Economics from Georgia State University.
