

Timothy J. Gill is Chief Economist of the American Iron and Steel Institute, the leading industry association of steel producers in the United States. In this role, he evaluates and forecasts the impact of economic conditions and policies on the steel industry and its end-use markets. He also provides analytical support to AISI's public policy, communications and market development teams; manages its industry statistics program; serves as staff director for its Committee on Industry Statistics and Economics and is the United States' representative to the World Steel Association's Economics Committee.

Previously, Tim has held positions at the National Electrical Manufacturers Association, the American Petroleum Institute and DRI/McGraw-Hill. He speaks frequently on the business and manufacturing sector environment and his forecasts of the U.S. economy were cited by The Wall Street Journal as among the most accurate of 2011, 2012, and 2013. He holds a B.A. from John Carroll University and an M.A. in economics from Miami University. He is an active member of the National Association for Business Economics and holds NABE's Certified Business Economist™ designation.
